

Remarks

The amendment to the specification merely states that this is a United States national entry of a PCT application, and gives the filing details of the PCT application and its priority.

The amendments to the claims remove multiple dependencies. Claim 7 has been amended by importing the wording of claim 3, so that the words "said further catheter" in claim 7 will have a proper antecedent. The dependency of claim 17 was in error, and the claim has been changed so that it depends from claim 16.

Respectfully submitted,

George E. Fisk
